## PROJECTS

### Book Your Adventure <https://app-booking.herokuapp.com>

- Full-Stack user friendly rental booking platform with user authentication , password encryption and protected routes
- Built custom RESTful API in Node.js and Express providing endpoints for both routing and for post/put/delete CRUD functionality

**Built with:** React, JavaScript, MongoDB, Mongoose, Node.js, Express & CSS

### Shell-Game <http://shell-game.herokuapp.com>

- a fully responsive full-stack application made in React with CSS animations
- Custom API routes built with Mongoose and Express to save player info in MongoDB

**Built with:** React, JavaScript, MongoDB, Mongoose, Node.js, Express & CSS

### Exchange Rates <http://exrates.surge.sh>

- Front-End React website displaying and converting all the world currencies
- the application gets the data from the Fixer API with Axios, having Euro as base currency

**Built with:** React, JavaScript & CSS
